DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 4-13, drawn to a traveling rolling digger comprising a shaft, cleaning blade and moving means and its method of use, classified in class 175, subclass 313.
 - II. Claims 2 and 14, drawn to a traveling rolling digger comprising a shaft, tilling blade and sleeve and its method of use, classified in class 175, subclass 314.
 - III. Claims 3 and 15, drawn to a traveling rolling digger comprising a shaft, cutting blade, and tilling blade or auger flight and its method of use, classified in class 37, subclass 213.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a drill. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as an excavator with a dual blade structure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as an excavator with a dual blade structure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

If the applicant elects Group 1, none of the claims are generic to a plurality of disclosed patentably distinct species comprising:

- Species 1: Figs 1, 1a, 1b
- Species 2: Fig. 2
- Species 3: Figs. 3-5

- Species 4: Fig. 6
- Species 5: Figs. 7, 8
- Species 6: Fig. 9
- Species 7: Figs. 10, 12, 13
- Species 8: Fig. 11
- Species 9: Fig. 14
- Species 10: Figs. 15, 16

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Herbert Goodman on 1/4/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
